Comments and Questions
GCABSS 2020

Paper No. 201208

Comment 1
Making use of monographs, logically construction, data analysis, grouping, and statistical methods, the research identified major global digitalization processes that affect the labor market and their correlation with the level of knowledge and skills and impacted by the situation. I find the multiplicity of techniques and combining them all together in one analysis a bit confusing. I would like to know more details on methodology applied.

Comment 2
The ideas are very interesting and the authors have managed to present them in a very good manner.

Comment 3
It is a good study to understand the impact of digital economy on the labor market.

Question No. 1
What is the definition proper of digital economy in your view?

Question No. 2
Why did you focus only on European Union in your study?

Replies by authors: Dec. 5-15
Issue of certificates: Dec. 20-
